### Notice for Users

This product must be fitted correctly over the designated area using the sizing guide specified, failure to do so will reduce the zone of protection and make any benefit of the product as a PPE item Obsolete. The protector is only designed for its intended use as a protective item to lessen the impact of a direct unintentional strike to the female Chest region it will not absorb all the energy of a hard direct strike to the Breast region.

Inspection: regular inspection should be conducted to check the protector for signs or wear and tear including the hard inner shell, stitching, elastic and all other components
